## Caratteristiche tecniche e lavorazioni

### Misure incasso

**bandella ad incasso**  
**montaggio a muro**

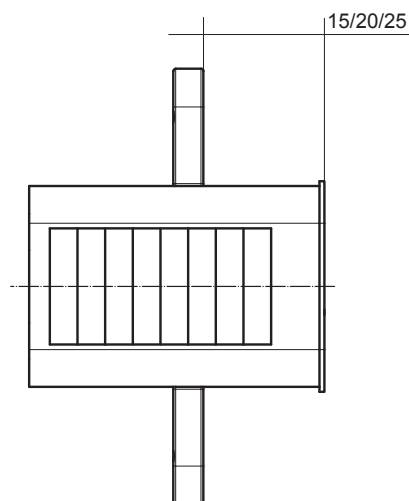

## Colli e battute

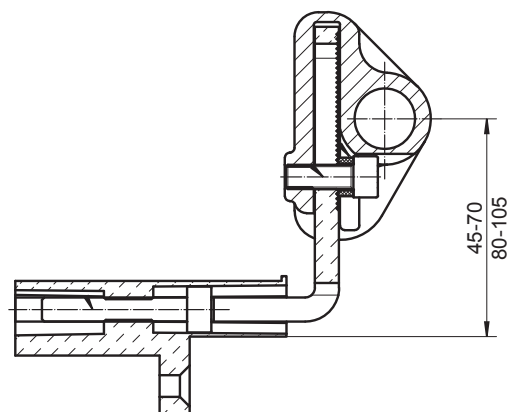

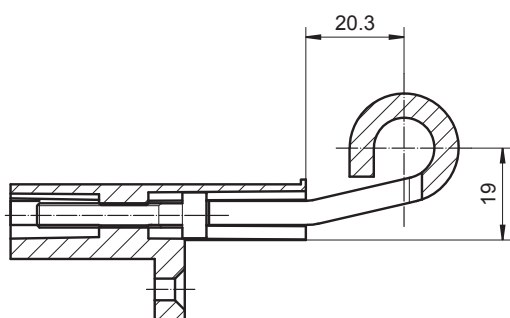

La bandella da incasso è disponibile con:

- battuta da 15/20/25 mm, con lo spessore da 5 mm

Entrambe le bandelle hanno:

- collo fisso da 19 mm
- collo variabile per le tre ante da 45 a 70 mm e da 80 a 105 mm.

**bandella ad incasso**  
**montaggio a muro**

## COLLO FISSO

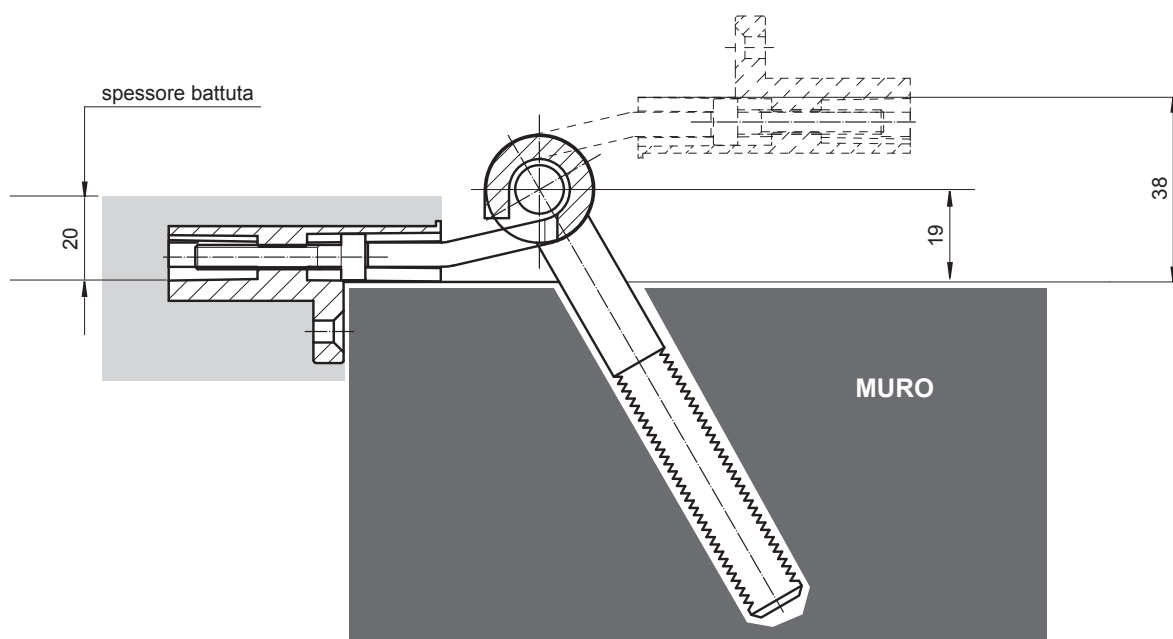

Per calcolare la distanza della persiana dal muro, bisogna sottrarre alla distanza di 38 mm lo spessore della persiana.

## bandella ad incasso montaggio a muro

Esempio:

battuta persiana = 20 mm

$19 \times 2 = 38 - 20 = 18$  mm distanza muro

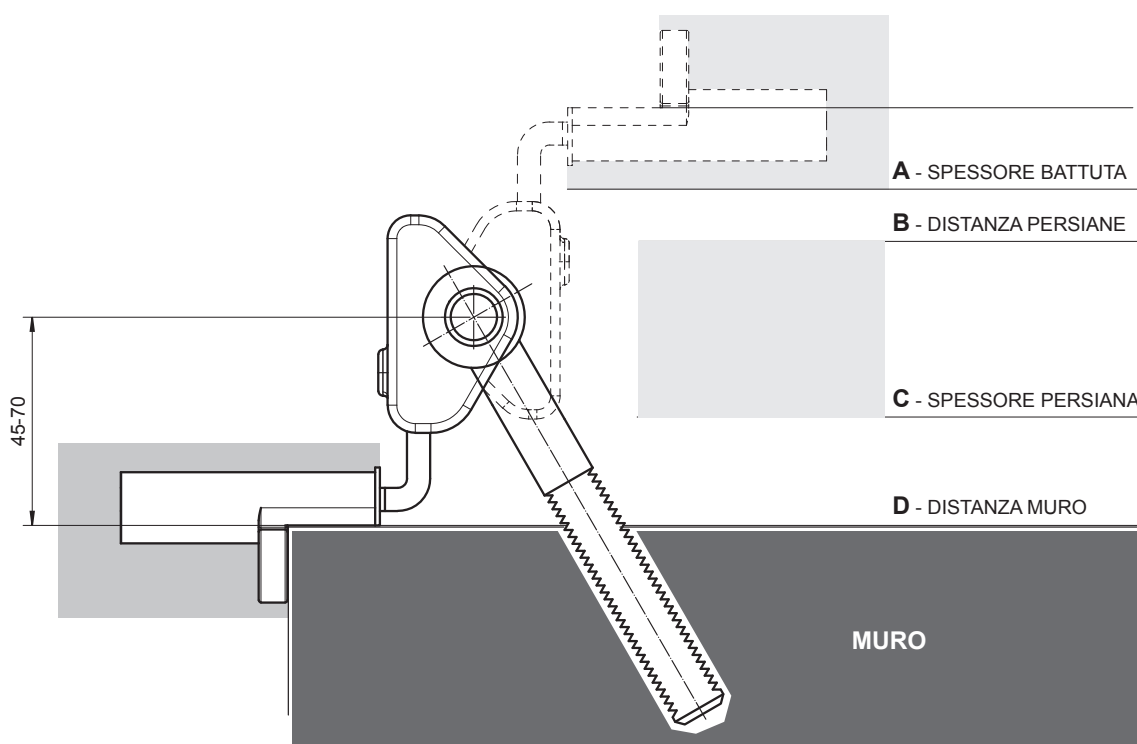

## CALCOLO DEL COLLO da utilizzare in base allo spessore delle persiane

$$\frac{(A+B+C+D)}{2} = \text{collo}$$

Esempio:

$$\frac{20+25+45+20}{2} = 55 \text{ mm}$$

**bandella ad incasso**  
**montaggio a muro**

## COLLO IN ACCIAIO

## La bandella a vista

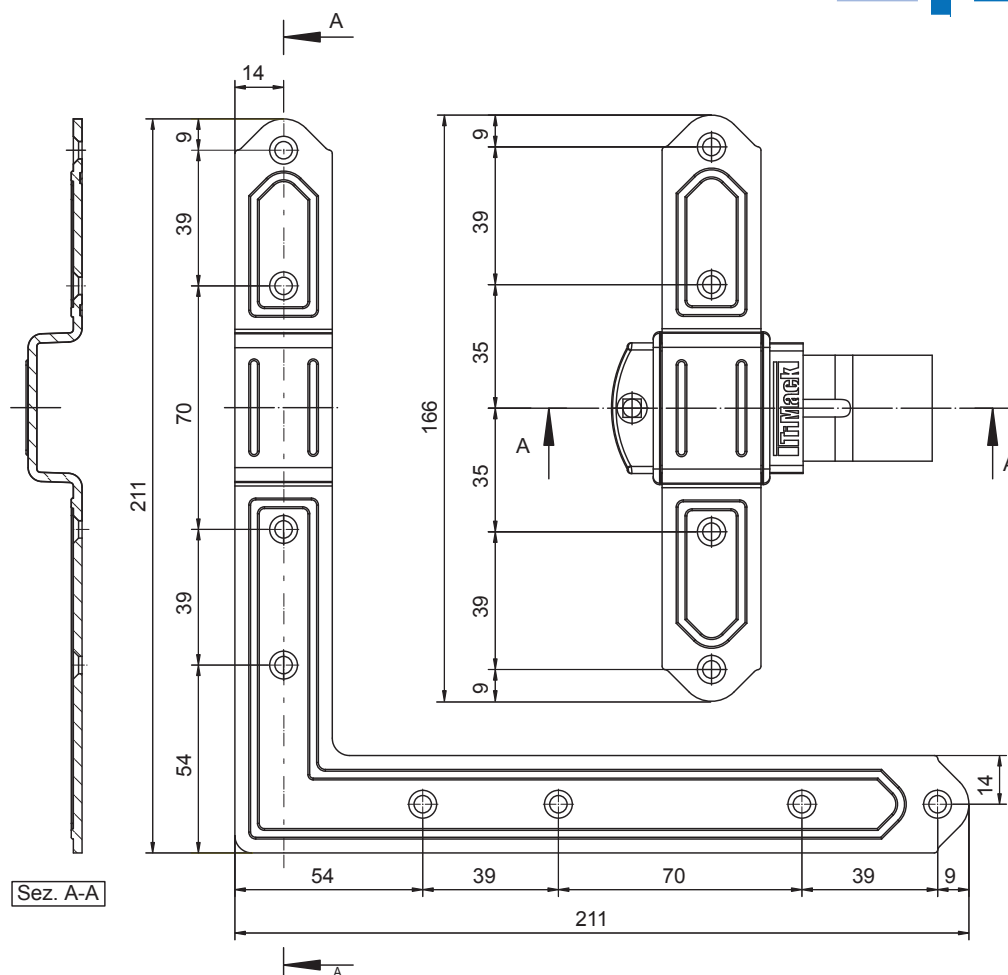

- a croce  
- ad angolo,  
con colli fissi e regolabili per le tre ante.

Le forature per le viti di fissaggio hanno lo stesso passo in tutte le versioni per facilitare la programmazione delle macchine a controllo numerico.

**bandella a vista**

---

**montaggio a muro**

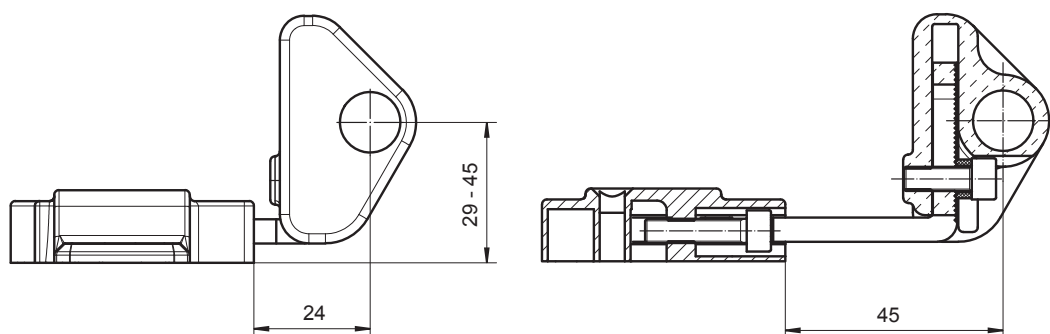

## Collo

I colli disponibili per le bandelle, sia a croce che ad angolo, sono:

- Distanza: 24 mm  
45 mm
- Collo da fissi da: 2 mm  
7 mm  
11 mm  
19 mm
- Collo regolabile per tre ante da: 29/45 mm

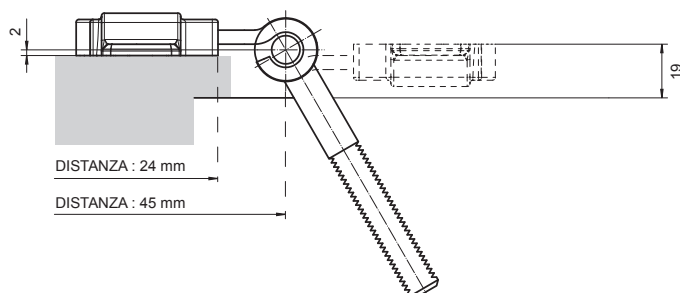

**bandella a vista**  
**montaggio a muro**

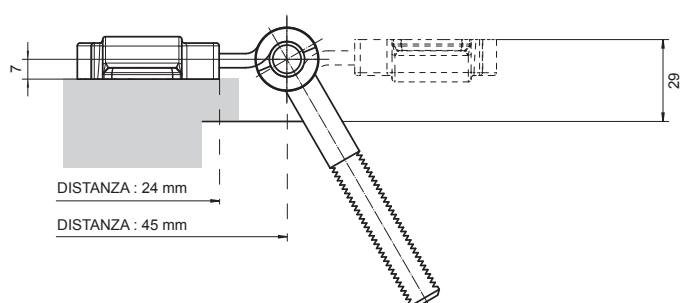

## COLLO FISSO

Il collo delle bandelle serve a determinare, una volta aperta la persiana, la distanza che la persiana stessa avrà dal muro.

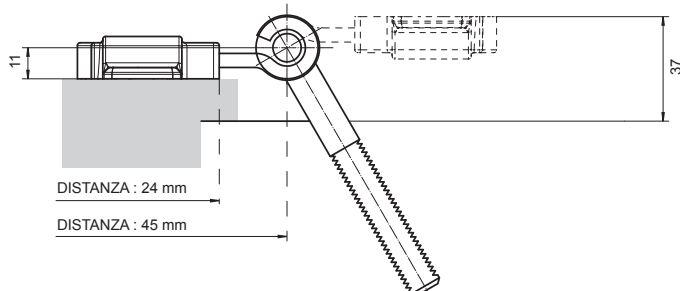

### bandella con collo 2 mm

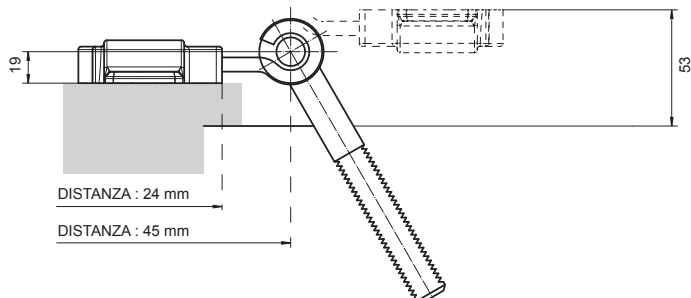

### bandella con collo 7 mm

### bandella con collo 11 mm

### bandella con collo 19 mm

**bandella a vista  
montaggio a muro  
con cardine**

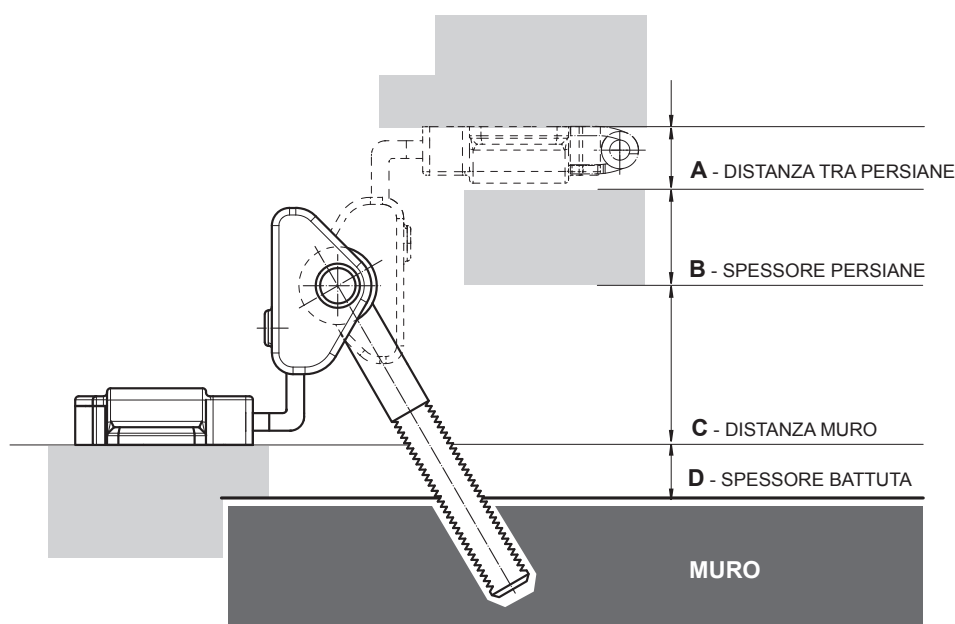

## CALCOLO DEL COLLO da utilizzare in base allo spessore delle persiane

$$\frac{A + B + C - D}{2} = \text{collo}$$

esempio:

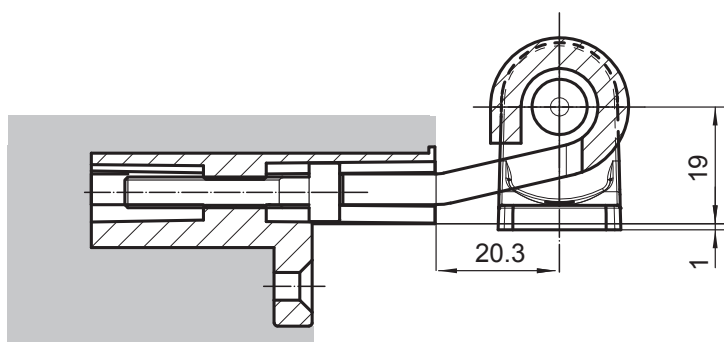

$$\frac{20 + 45 + 25 - 20}{2} = 35 \text{ mm}$$

**bandella a vista  
montaggio a muro  
con cardine**

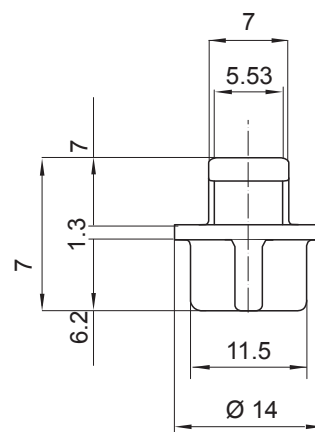

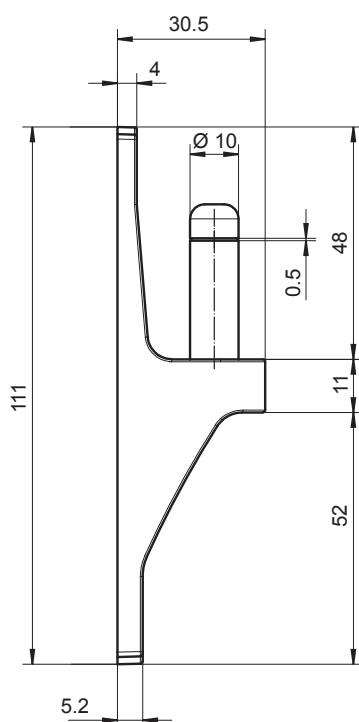

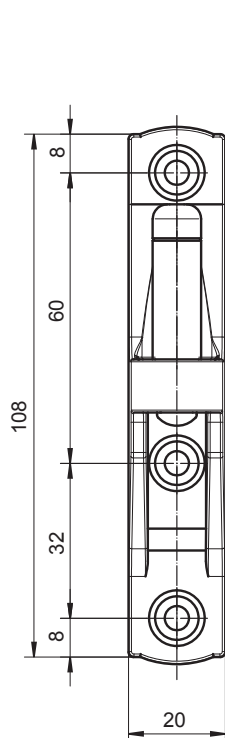

## COLLO FISSO

Anche con la bandella ad incasso è possibile eseguire il montaggio delle persiane con monoblocco a filo usando il cardine su piastra con distanza 20 mm.

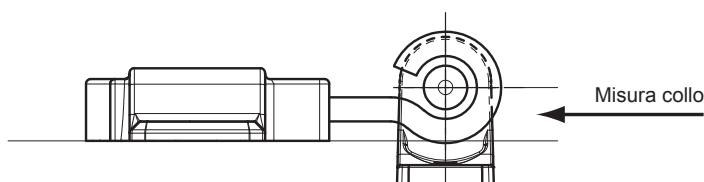

**bandella ad incasso**  
**montaggio a telaio**  
**con cardine su piastra**

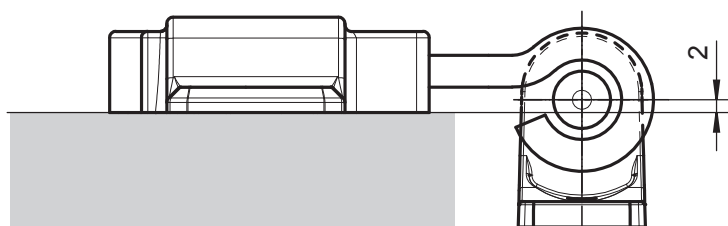

## COLLO FISSO

Abbinando i tre colli con i due cardini su piastra, è possibile montare persiane con spessore battuta da 6mm a 18 mm, inoltre abbinando i due spessori per cardine di 1 mm. e 3 mm., si può soddisfare qualsiasi esigenza di spessore persiana

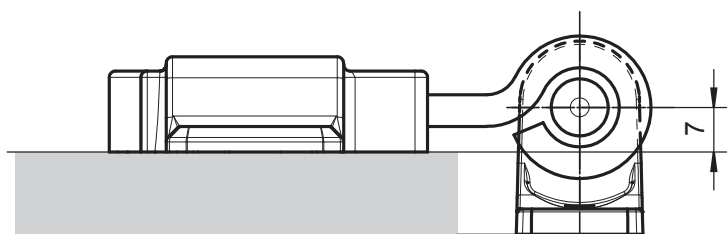

**bandella a vista**  
**montaggio a telaio**  
**con cardine su piastra**

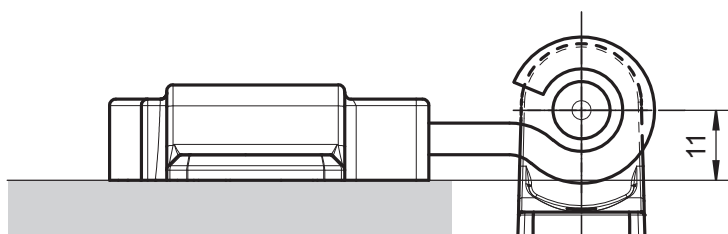

## CARDINE SU PIASTRA DISTANZA 20

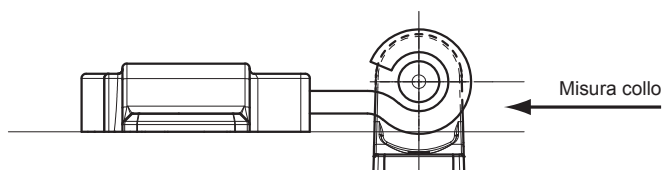

**SPESS. BATTUTA 18**

**SPESS. BATTUTA 13**

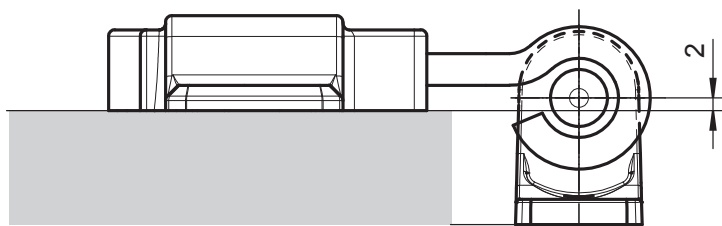

**SPESS. BATTUTA 9**

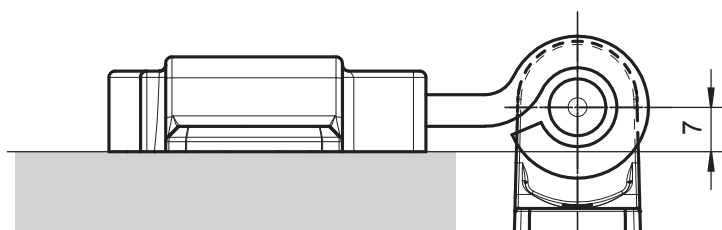

## bandella a vista montaggio a telaio con cardine su piastra

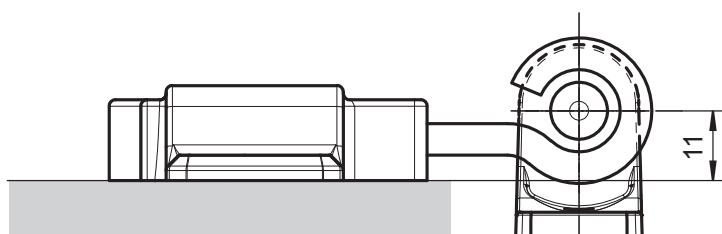

### CARDINE SU PIASTRA DISTANZA 17

**SPESS. BATTUTA 15**

**SPESS. BATTUTA 10**

**SPESS. BATTUTA 6**

Con le tre misure:

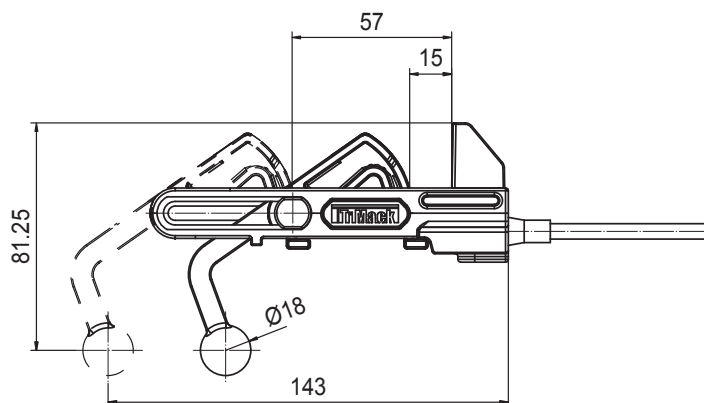

15/57 mm  
90/132 mm

è possibile utilizzare il fermapersiana a partire dall'anta con battuta inferiore fino alla tipologia a libro con ante di spessore di 45 mm.

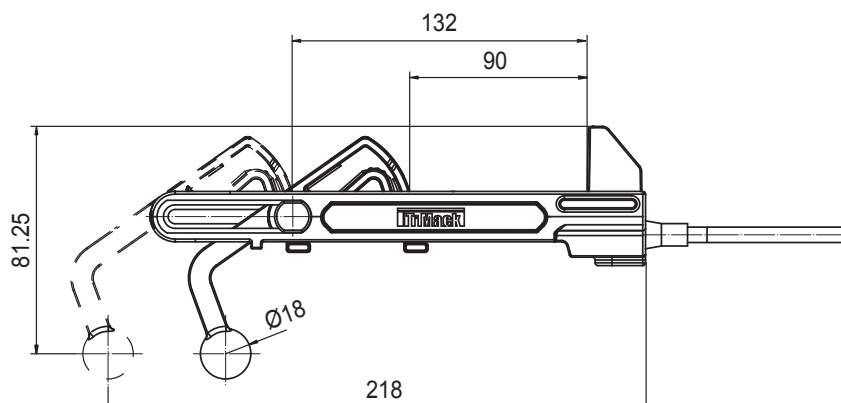

Il montaggio è inoltre facilitato dal perno in tre misure diverse fornito diviso dal corpo per facilitare l'avvitamento dello stesso al muro.

Il blocco dell'anta è automatico, mentre lo sblocco può essere effettuato solo con una mano, al fine di agevolare la chiusura dell'anta.

## fermapersiana

**GR. 1**

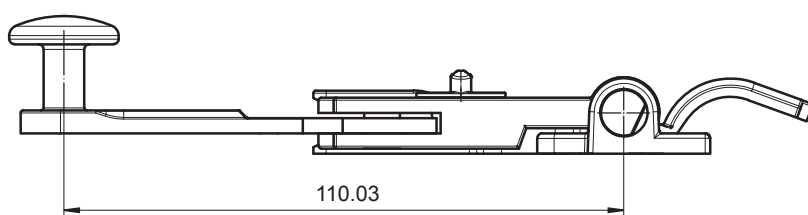

**GR. 2**

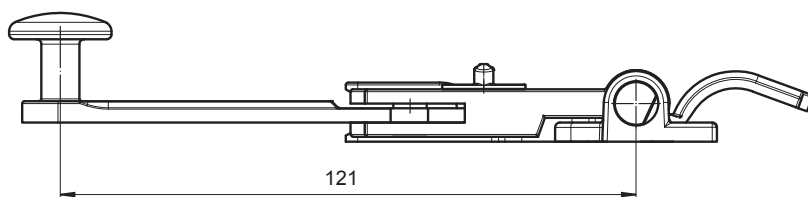

## 1/2 ANTE

La confezione spagnoletta, applicabile sia in un'anta sia in due, comprende la maniglia e le due griffe di chiusura progettate in dimensioni maggiorate per una maggiore tenuta e con un doppio anello di ritenzione per una maggiore sicurezza nel tempo.

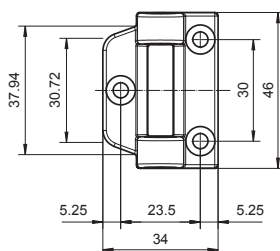

### Maniglia standard

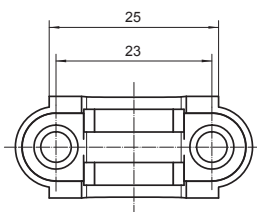

### Maniglia lunga

Per le ante a libro, è possibile montare centralmente bandelle in vista con collo simmetrico o con collo asimmetrico, queste ultime per evitare l'eventuale sormonto con la bandella
